MARETT'S PEDIGREED

BREEDER'S

In *White Gold* (non-wilt) you will find these excellent characteristics; picking quality, the very best; storm resistance good, in being easy to pick we have not sacrificed this cotton's ability to withstand normal winds and rains; uniformity of fiber is very good; a good turnout at the gin; medium light foliage, and carrying high tolerance to wilt. This variety is not recommended as a wilt resistant cotton, but it has given very good results on mildly infested wilt soils. All seed machine delinted and cerasan treated.

WHITE GOLD

FOUNDATION STOCK

DESCRIPTION

SEASON: Early.

PLANT: Medium dwarfy with usually 2 vegetative branches and evenly spaced fruiting branches.

FOLIAGE: Medium light.

MARETT'S PEDIGREE

BREEDER'S FOUND

White Gold Wilt has proven itself to be one of the best wilt-resistant varieties on the market today. Since nematode (root-knot) infection is often associated with wilt, we are very proud to say that our White Gold Wilt variety, through experiment station results, has proven to have one of the highest, tolerant resistance to this infection.

The lint quality is excellent, having excellent spinning test results, which the cotton buyers are always anxious to find in their purchases; gin turnout has been exceptionally good; very early maturing; easy to pick, and also maintaining good storm resistance. All seed are machine delinted and ceresan treated.

D WHITE GOLD WILT

NDATION STOCK

DESCRIPTION

SEASON: Very early (8 to 10 days earlier than non-Wilt White Gold Strains).

PLANT: Fairly uniform medium height, with 1 to 2 vegetative branches, fruiting branches nicely spaced.

BUSINESS TERMS

OUR RESPONSIBILITY: All of our seed are tested for germination by lot numbers before they are sent out. You have the privilege to examine each bag of seed upon arrival. If they are not satisfactory you are permitted to return them within eight days.

YOUR RESPONSIBILITY: We waive all responsibility for seeds which have been in customer's hands for more than eight days, as any seed may be killed or germination lessened by subjecting them to too much moisture, heat, brine, chemicals, etc. Under no circumstances will we be responsible for germination of seed after planting, whether within eight days or not. Return seed at once, if you do not accept these conditions.

COTTON SEED: All bags loaded 100 lbs. to the bag. One bag, 3 1/3 bu.; 2 bags, 6 2/3 bu.; 3 bags, 10 bu.

WEIGHTS: All seed machine delinted and graded, 30 pounds to bushel.

All Seed are Registered by the South Carolina Seed
Improvement Association
